after the death of her wealthy husband a young widow must settle the estate with his son the same man who once broke her heart caroline dawson survived the town gossips who whispered behind her back she survived the slow death of her husband roscoe lancaster the richest man in the county and her senior by three decades but she feared she might not survive rick lancaster her husband s son years before she married when she and rick were teens he introduced caroline to her first tremulous taste of love and then broke her heart now he s back rick says he wants to settle his father s estate but his storm of emotions is undeniable and more dangerous than ever and what he really wants is to settle the score with caroline

ella barron runs her texas boarding house with the efficiency of a ship s captain and the grace of a gentlewoman she cares for her ten year old son solly a sweet but

challenging child whose busy behavior and failure to speak elicits undesired advice from others in town ella's plate is full from sunup to sundown but when a room in her boarding house opens up and the respected town doctor dr kincaid brings ella a new boarder the handsome and gallant mr david rainwater ella is immediately resistant to opening up her home to this mysterious stranger

growing populations increasing industrial use and heavy agricultural demand are beginning to tax water supplies in many regions of canada since many rivers are already fully allocated to numerous uses future economic and social development will depend upon how much we know about our surface and ground water resources and how effectively we manage them especially in the face of climate change the message to take home from this eloquent book is that it is time to dispel the myth of limitless abundance of water in canada and throughout north america we all need to be mindful that though our technologically sophisticated society is largely fuelled and lubricated by refined petroleum it ultimately runs on plain water in his conclusion to this authoritative book robert sandford chair of canada's united nations water for life decade offers a realistic picture of the various issues and threats related to the future availability and quality of fresh water in canada

forestry professors used to remind students that whereas physicians bury their mistakes foresters die before theirs are noticed but good institutions live longer than the scientists who contribute to building them and the half century of work of the usda forest service's institute of tropical forestry itf is in plain view an unprecedented corpus of accomplishments that would instill pride in any organization there is scarcely anyone interested in current issues of tropical forestry who would not benefit from a refresher course in itf's findings its early collaboration with farmers to establish plantations its successes in what we now call social forestry its continuous improvement of nursery practices its screening trials of native species its development of wood processing technologies appropriate for developing countries its thorough analysis of tropical forest function and its holistic approach toward conservation of endangered species fortunately itf has a long history of information exchange through teaching like many others i got my own start in tropical forest ecology from just such a course in puerto rico and long before politicians recognized the global importance of tropical forestry the itf staff served actively as ambassadors of the discipline visiting tropical countries everywhere to learn and when invited to do so to help solve local problems it is a general principle of biogeography that species turnover rates on islands are higher than those on continents inevitably the same is true of scientists assigned to work on islands

this reference can be used by adult and teen readers seeking information about their favorite writers and is a useful source for student reports and research papers book jacket

he shows by volcano studies and graphs that for over 200 years 95 of global air pollution has come from volcanoes that there has been no global warming trend over the last 200 years he also defines the ozone what it is and does and explains the hole in the ozone and how it works he describes the greenhouse effect as over rated and tells what really occurs that could or could not cause future problems with global warming part ii of this book covers the six most significant eruptions in recorded history and graphically illustrates the awesome power of a single volcano and man s ridiculous notion to control it

original copyright 1985 includes excerpt from bittersweet rain by sandra brown p 1 14

although biologists have directed much attention to estimating the extent and causes of species losses the consequences for ecosystem functioning have been little studied this book examines the impact of biodiversity on ecosystem processes in tropical forests one of the most species rich and at the same time most endangered ecosystems on earth it covers the relationships between biodiversity and primary production secondary production biogeochemical cycles soil processes plant life forms responses to disturbance and resistance to invasion the analyses focus on the key ecological interfaces where the loss of keystone species is most likely to influence the rate and stability of ecosystem processes
